

FORMULA 522

ODOR PUCK WASTE TANK ODOR ELIMINATOR WITH FOAM CONTROL

Product Description

Sentinel 522 Odor Puck is a water soluble solid block designed to eliminate odors and control foam in the waste water of most truck mounts, portable extractors and auto scrubbers.

Application Information (Always follow product label instructions for best results)

Usage Guidelines:

The Odor Puck will slowly dissolve in the waste water eliminating odors and controlling foam.

Odor Puck dissolving times will vary depending on water temperature, soil contaminant level and other environmental factors.

Read directions and review Safety Data Sheet prior to use. Follow Local, State and Federal regulations when disposing of waste water.

Directions For Use:

Break tab on container and remove lid. Remove solid Odor Puck from container.

Place the Sentinel 522 Odor Puck in a filter basket (fig. A), mesh sock* (fig. B) or directly in waste tank (fig. C). If using a mesh sock, secure in waste tank ensuring contact with the waste water.

Once the Odor Puck has dissolved and shrunk down to 1" in diameter, add a new Odor Puck to continue odor elimination and foam control.

Directions For Use Continued:

*When using a mesh sock, make sure it is securely tied down within the waste tank.
